PROFILE

Institutional-governance researcher and nonprofit founder developing the Acknowledge Economy (AE) and AJ-OS, an experimental system for preserving, validating, and attributing human contribution as organizational knowledge becomes increasingly embedded in AI. More than two decades of experience across law, government, international organizations, nonprofit management, public administration, and institutional design.

RESEARCH & EXPERIMENTAL WORK

Acknowledge Economy (AE) / AJ-OS — Independent Research Program | Alexandria, Virginia | 2021–Present

- Developing AE, an experimental institutional and corporate-governance model examining whether productive human contribution can remain connected to economic and institutional participation as automation reduces dependence on continuing human labor and knowledge.
- Designed AJ-OS, an experimental operating system for identifying, preserving, validating, and attributing human contributions and connecting them to measurable organizational impact.
- Developed the analytical sequence activity → event → validated contribution → impact → value → potential participation and the broader research architecture Contribution → Participation → Governance → Control.
- Designed and launched a seven-contributor pilot inside ILHR to test whether contribution events can be recorded, validated, and traced reproducibly in an operating organization.
- Current experiment tests founder independence: whether contributors can repeatedly identify and register valid events without substantial intervention from the system's creator.
- Research also examines knowledge provenance, governance capacity, collective governance, and human cooperative intelligence as AI systems become more capable and organizations potentially become less dependent on continuing human contribution.

Institutional Governance Research | Washington, DC & Virginia | 2020–2024

- Conducted applied work on organizational learning, attribution, ownership, governance, accountability, incentives, and mission-preserving institutional structures.
- Developed performance-tracking approaches connecting contribution, institutional learning, accountability, and measurable organizational outcomes.
- This work provided part of the institutional foundation for the subsequent AE/AJ-OS research program.

PROFESSIONAL & POLICY EXPERIENCE

Immigration Law Human Rights (ILHR) — Founder & Executive Director | Washington, DC & Virginia | 2019–Present

- Founded and lead a public-interest nonprofit integrating immigration legal services, public education, organizational research, governance, and technology development.
- Designed governance structures, compliance systems, accountability mechanisms, workflow measurement, contribution tracking, and knowledge-preservation processes.
- Direct interdisciplinary work involving legal professionals, developers, researchers, students, and organizational contributors.
- Established ILHR as the initial experimental environment for AE/AJ-OS, allowing contribution-attribution and governance mechanisms to be tested within an operating institution.

Independent Geopolitical & Public Policy Analyst | Alexandria, Virginia | 2026–Present

- Produce bilingual English/Spanish analysis on geopolitics, public policy, AI and technology governance, national security, law, economics, and institutional accountability.
- Produced approximately 360 short-form analyses over six months, translating complex policy and institutional developments into accessible public-facing analysis.

Municipality of Ventanilla — Public Administration | Ventanilla, Peru | 2022–2023

- Worked on institutional and operational reforms associated with an approximately 41% increase in organizational productivity.
- Developed practical experience with administrative processes, performance measurement, governance structures, and institutional incentives.

Immigration Legal Practice & Public-Interest Work — Legal Manager & Strategist | Miami, Washington, DC & Alexandria | 2002–2019

- Managed complex U.S. immigration matters and conducted extensive legal, regulatory, country-conditions, comparative-policy, and institutional research.
- Developed legal strategies and coordinated services across attorneys, families, community organizations, government institutions, and other stakeholders.

International Organization for Migration (IOM) — Legal & Policy Research Intern, Office of the Director General | Geneva, Switzerland | 2012

- Supported research and policy analysis involving European Union affairs, international migration, migrant economic rights, labor mobility, displacement, and protection.

- Worked in a multinational institutional environment involving international organizations, governments, UN agencies, and European stakeholders.

Congress of the Republic of Peru — Legal Counsel & Legislative Researcher | Lima, Peru | 1993–2001

- Conducted legal and legislative research on constitutional reform, institutional governance, indigenous rights, and public policy.
- Contributed to legal drafting, statutory analysis, and legislative development while working with legislators, public institutions, and civil-society actors.

EDUCATION

George Washington University Law School — Washington, DC | Master, International & Comparative Law, 2008
